Intelligent use of power for reduced energy consumption

The Öko Timer enables you to use energy more efficiently by using the hob's residual heat during the last few minutes of the cooking process.

Extra efficiency use of residual heat

For each heat zone on the hob, the OptiHeat Control tracks the level of residual heat, so you can make the most of your remaining heat and optimize your energy usage.

Closely monitor each stage of the cooking process

To enable you to closely monitor the progress of each dish, the hobs CountUp Timer starts at zero and keeps counting until you stop or reset it.

Remembers where you left off

Whenever you get interrupted, you can put your cooking on hold with the Pause button. It makes sure nothing burns if you're called away from the kitchen and, conveniently, it remembers the different heats under all your pans. So when you're ready, one touch puts you back exactly where you left off.
