

Exact heat for impeccable results

Induction helps you master any cooking technique faster and can even boil water in under 90 seconds. The heat adjustments are so subtle that they help you produce the finest tastes and textures every time you cook.

Product Benefits & Features

The hands-free hood

The Hob2Hood function connects the hob and the hood. The cooker hood automatically adjusts the fan speed based on the heat, without lifting a finger. For powerful extraction when searing. And quieter extraction when simmering.

Direct Access. Instant and effortless.

Enjoy effortless heat adjustments with Direct Access. Instead of tapping several times to increase the heat, you can now tap the number directly for the right amount of heat. Instantly.

The cooler surface for a safer kitchen

Our intelligent induction technology heats pans and the food in them, but nothing else. The surface around the pans stays cool. So if you accidentally touch the hob near the pans while you're cooking, your fingers are safe.

Quicker heat for extra speed

No more waiting around for pots to boil. The PowerBoost button gives you an instant burst of heat that boils water in under 90 seconds* – that's even faster than an electric kettle. It's perfect for tasks like boiling potatoes, and other quick cooking jobs too, like searing meat.

The adaptable surface for every pan

The MaxiSense® induction hob has self-sizing cooking zones. That means each zone detects the sizes and shapes of the pans you're using, however large or small, and sends immediate heat to fit their bases exactly. So you have complete control, and the hob responds just the way you need it to.
