

More space. More taste. At once

The 6000 Bridge Induction Hob can easily cope when you're cooking with bigger pans. The Bridge function links two cooking zones on two sides of the hob to fit any large or long pan. The bridged zone will share the same temperature and time.

The hands-free hood

The Hob2Hood function connects the hob and the hood. The cooker hood automatically adjusts the fan speed based on the heat, without lifting a finger. For powerful extraction when searing. And quieter extraction when simmering.

The adaptable surface for every pan

The MaxiSense® self-sizing cooking zones detect the sizes and shapes of each pan. However large or small. It sends immediate heat to fit their bases, without compromising on performance. Experience the ultimate in kitchen adaptability. For complete culinary control.

The cooler surface for a safer kitchen

Our intelligent induction technology heats pans and the food in them, but nothing else. The surface round the pans stays cool. So if you accidentally touch the hob near the pans while you're cooking, your fingers are safe.

Quicker heat for extra speed

No more waiting around for pots to boil. The PowerBoost button gives you an instant burst of heat that boils water in under 90 seconds* – that's even faster than an electric kettle. It's perfect for tasks like boiling potatoes, and other quick cooking jobs too, like searing meat.
